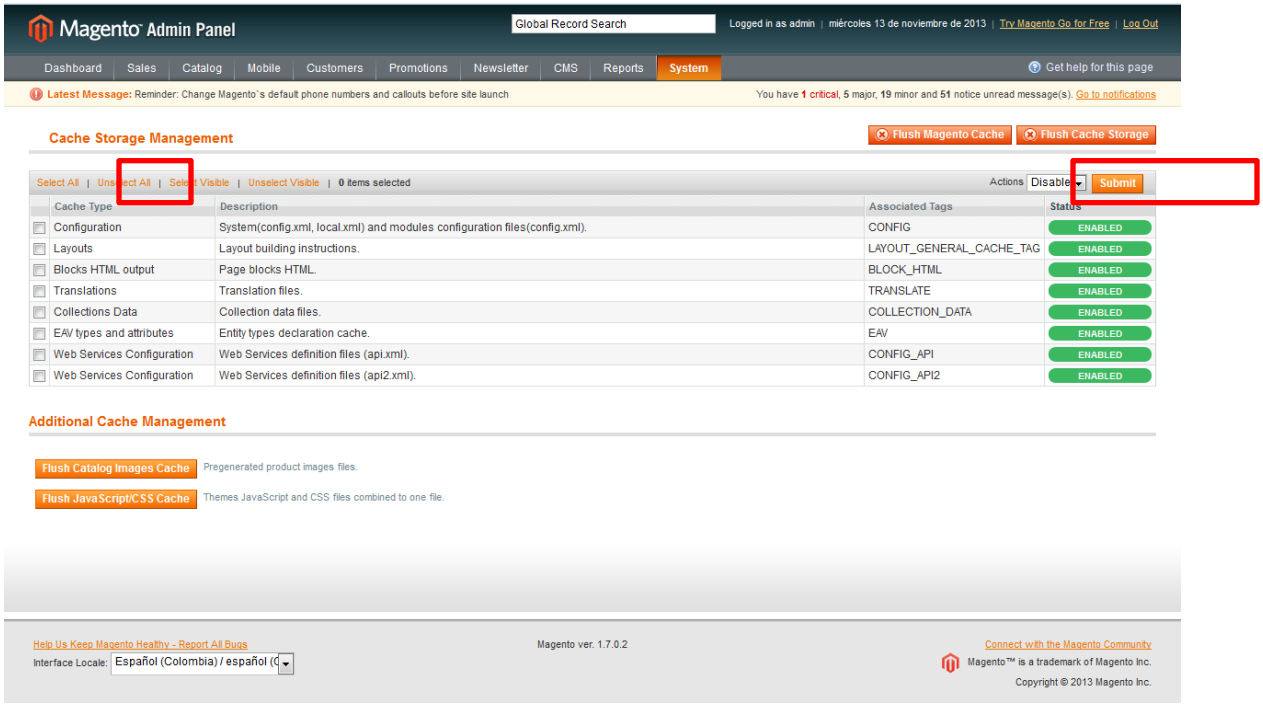
INSTALLATION AND SETUP HANDBOOK OF PAYU LATAM'S PLUGIN FOR MAGENTO

1. Requisites

- Have an active account in PayU Latam.
- Have installed Magento version 1.7.

2. Installation

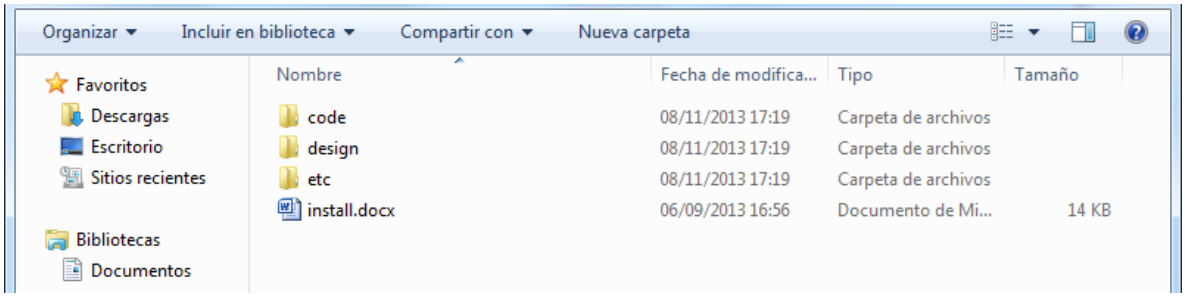
- Before installing the plugin, disable the cache of Magento. In order to do that, go to System > Cache Management, select all caches. In the drop-down list at the top right select the "Disable" option, then click the "Submit" button to the right.



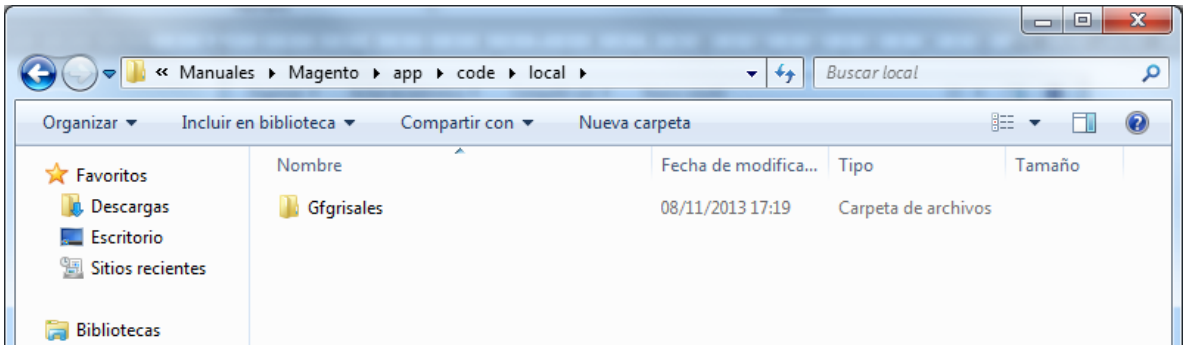
- Download PayU's plugin for Magento, available in this section.

- Unzip the plugin-magento-1.2-zip file. The unzipped folder is called "app" and contains:

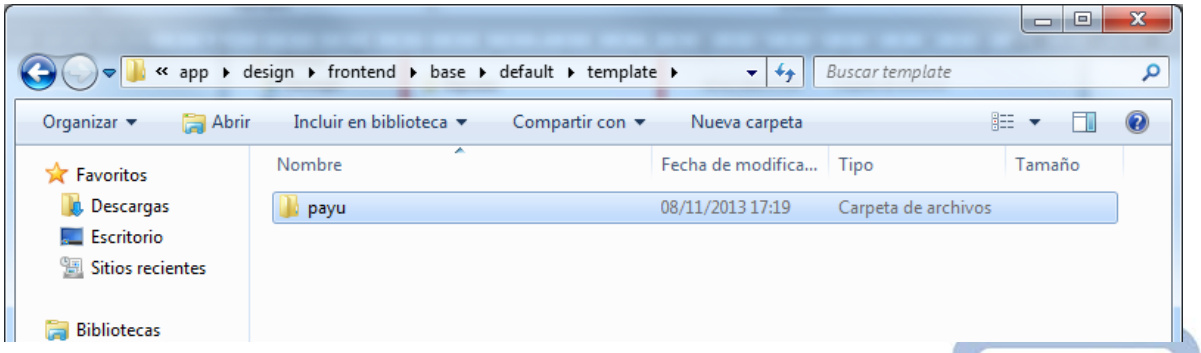
a. code
b. design
c. etc
d. install.doc



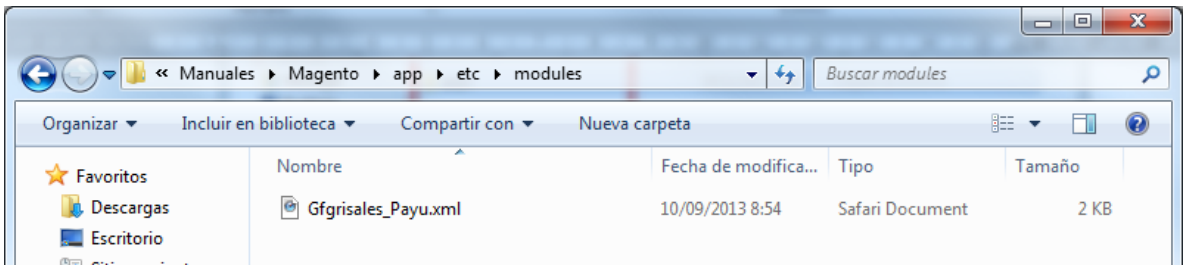
- Copy the "Gfgrisales" folder located in "app/code/local" within the "local" folder in the root of Magento installation, which is in the "app/code" folder. If the "local" folder does not exist in the path of Magento, you must create it and then copy the listed files. Make sure all the folders are all read/write enabled.



- Now copy the "payu" folder of the "app / design / frontend / base / default / template / payu" path of the decompressed file, inside of the "app / design / frontend / base / default / template" folder located inthe root of the Magento installation.

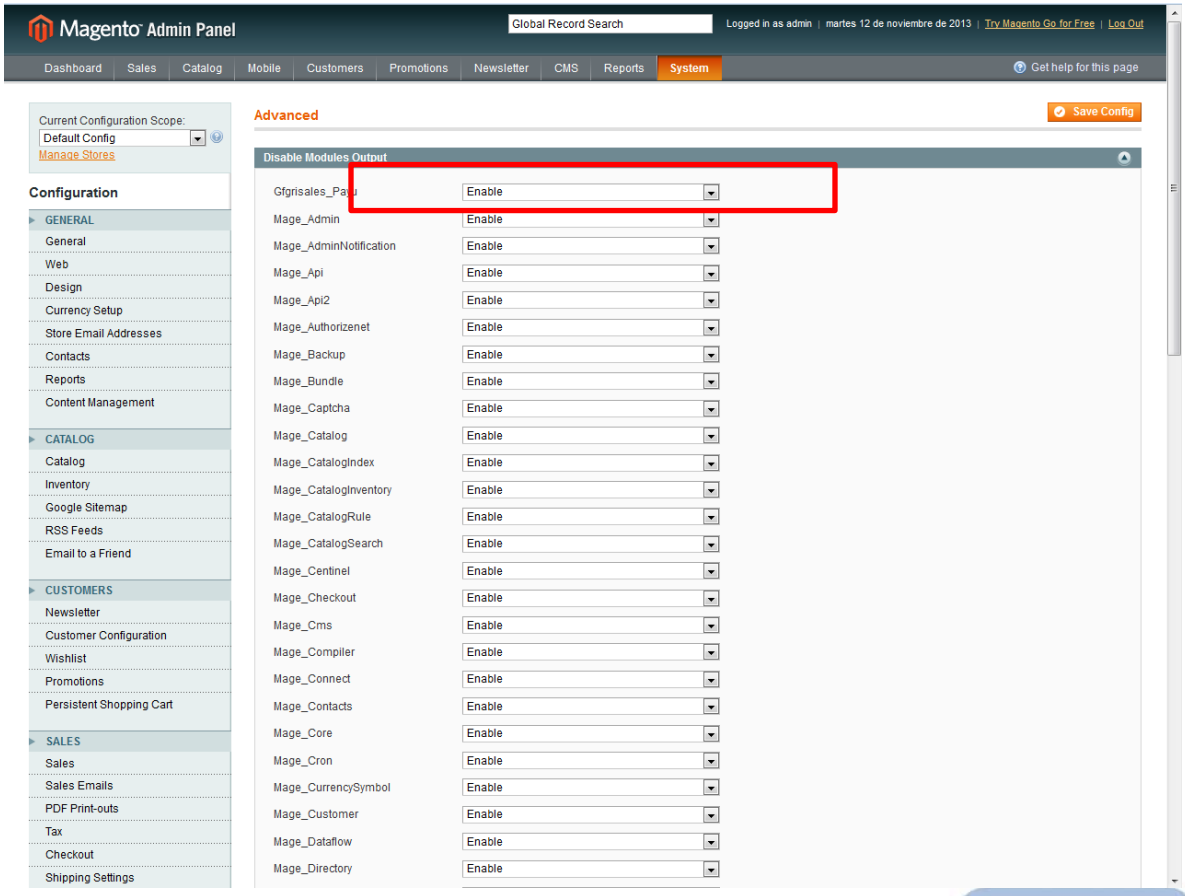


- The last file to be copied is "Gfgrisales_Payu.xml" located in "app / etc / modules" of the uncompressed file. This must be copied into the "app / etc / modules" folder, located in the root of the Magento installation.
-

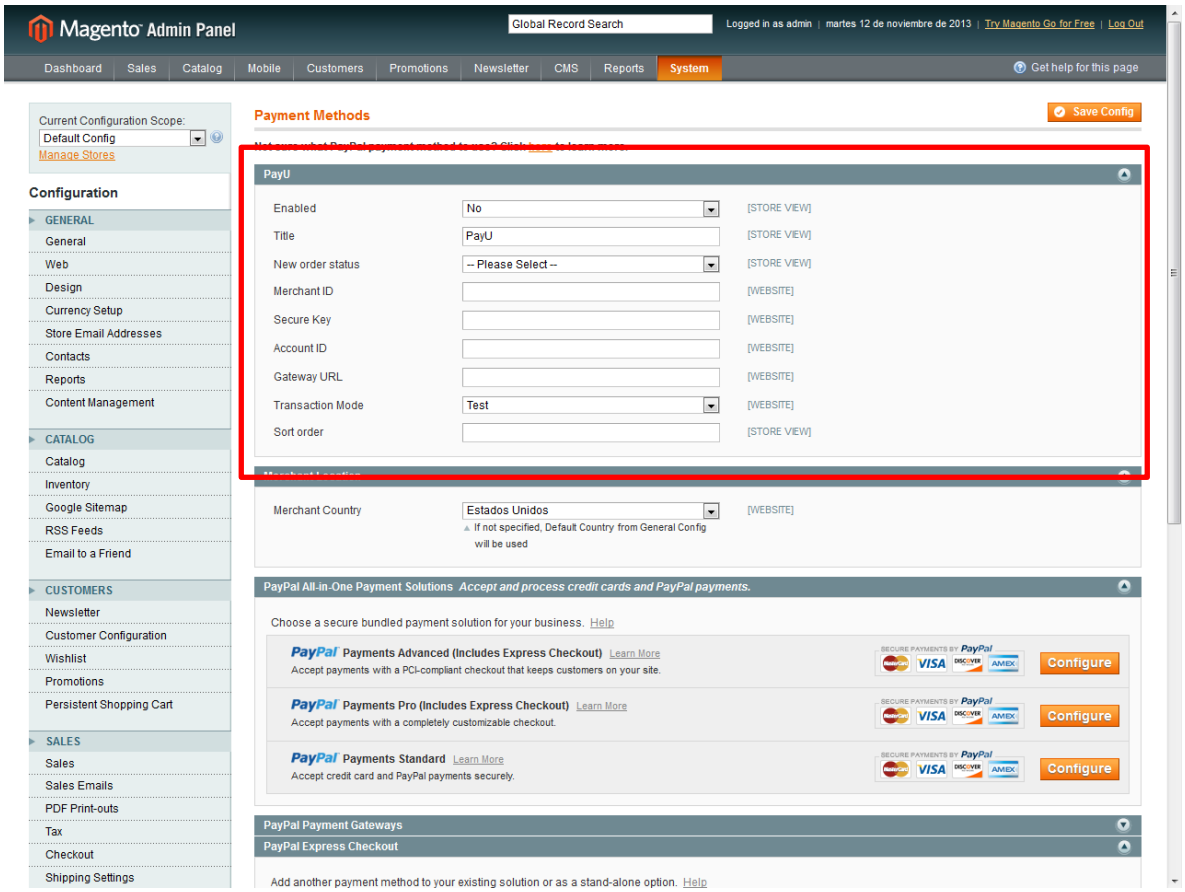


Configuration of the PayU Latam payment means:

1. Enter the Magento administrator and go to the System> Configuration> Advanced> Advanced menu. Click on "Disabled Modules Output" and enable PayU's extension called "Gfgrisales_Payu".



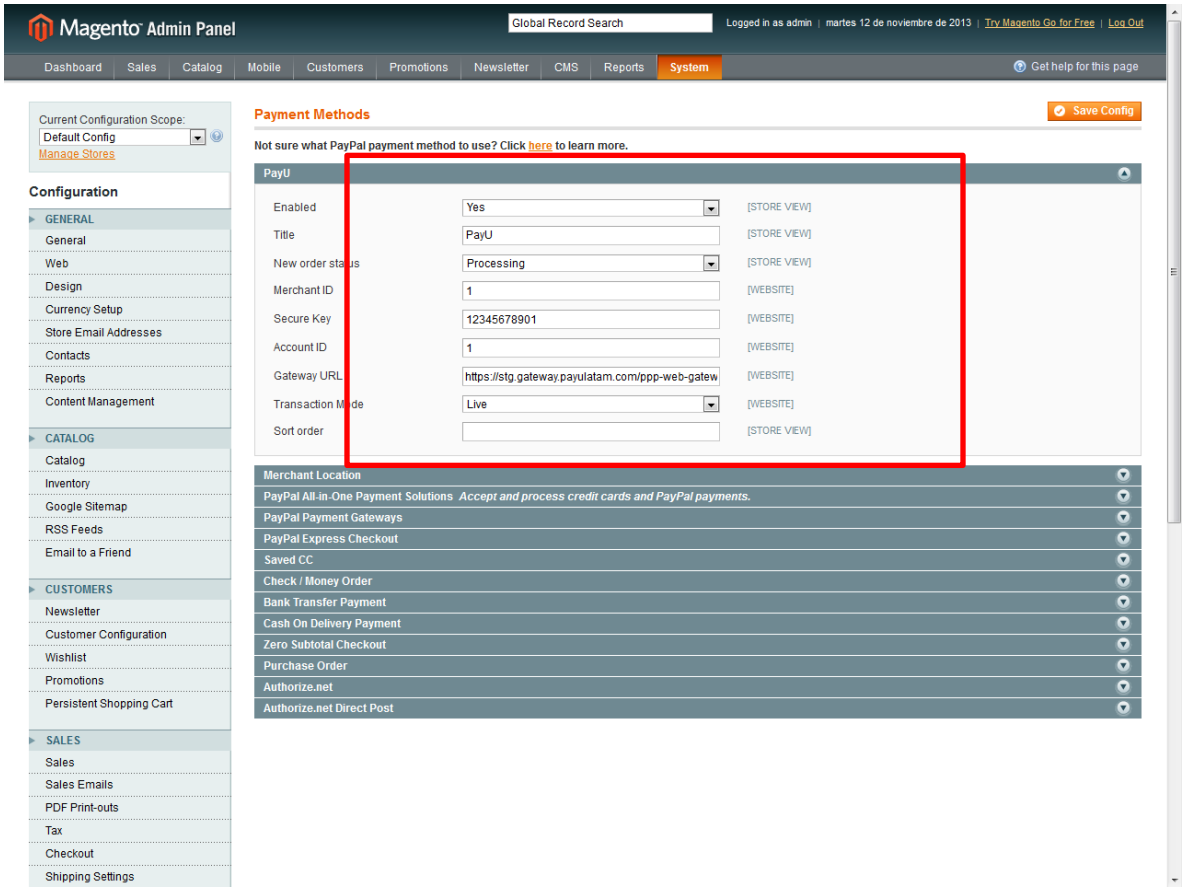
2. Then, while being in Setup, click "Sales> Payment Methods" where PayU's payment method should appear. To display the tab click on it.



3. Complete each of the fields according to the data from your PayU Latam account:

Field	**Value**
Enabled	This must be "Yes".
Title	PayU
New order status	Status of payments in Magento after being created.
Merchant ID	ID of the shop in PayU Latam.
Secure Key	This is provided by PayU and is unique to the shop (ApiKey).
Account ID	Country's account ID.
Gateway URL	PayU's URL. To test you can use the https://stg.gateway.payulatam.com/ppp-web-gateway URL and for production https://gateway.payulatam.com/ppp-

	web-gateway/
Transaction Mode	Indicates if transactions will be made in test mode.



4. Finally save the configuration.

Now your customers can pay through PayU when checking the shopping cart out.
