

INSTALLATION MANUAL FOR PAYU'S OPENCART PLUGIN

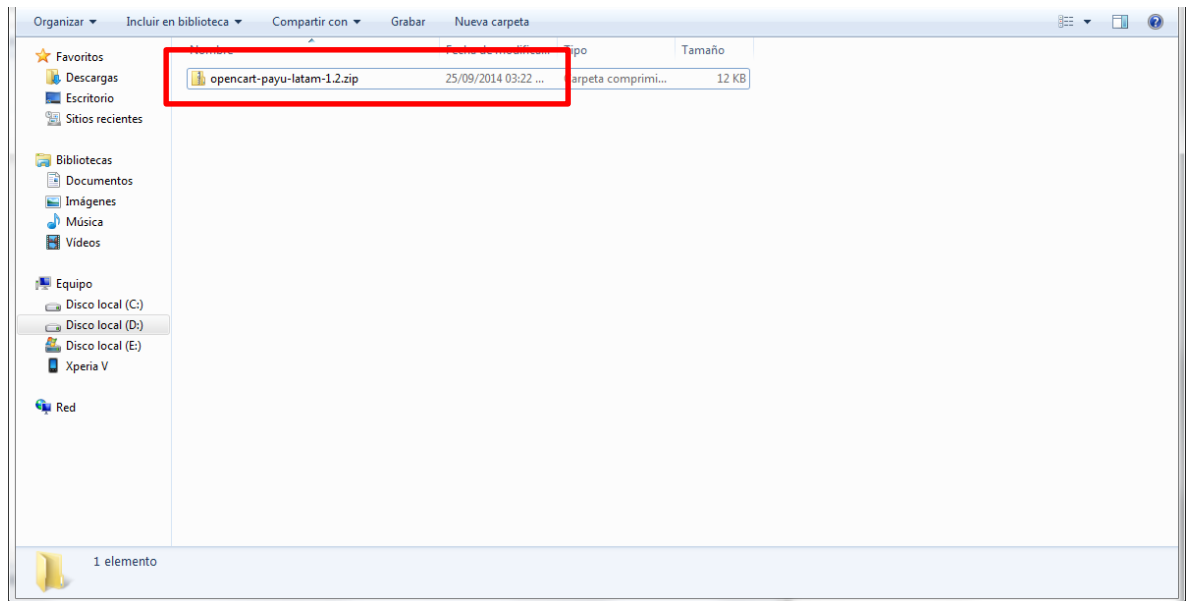

Opencart is a free platform developed in PHP to create online stores. OpenCart provides a professional and reliable foundation on which to build an online store; this foundation appeals to a wide variety of users; ranging from web developers looking for a user-friendly interface to store owners who want to launch their online business for the first time. OpenCart has a lot of features that give you great control over your store's customization.

Prerequisites:

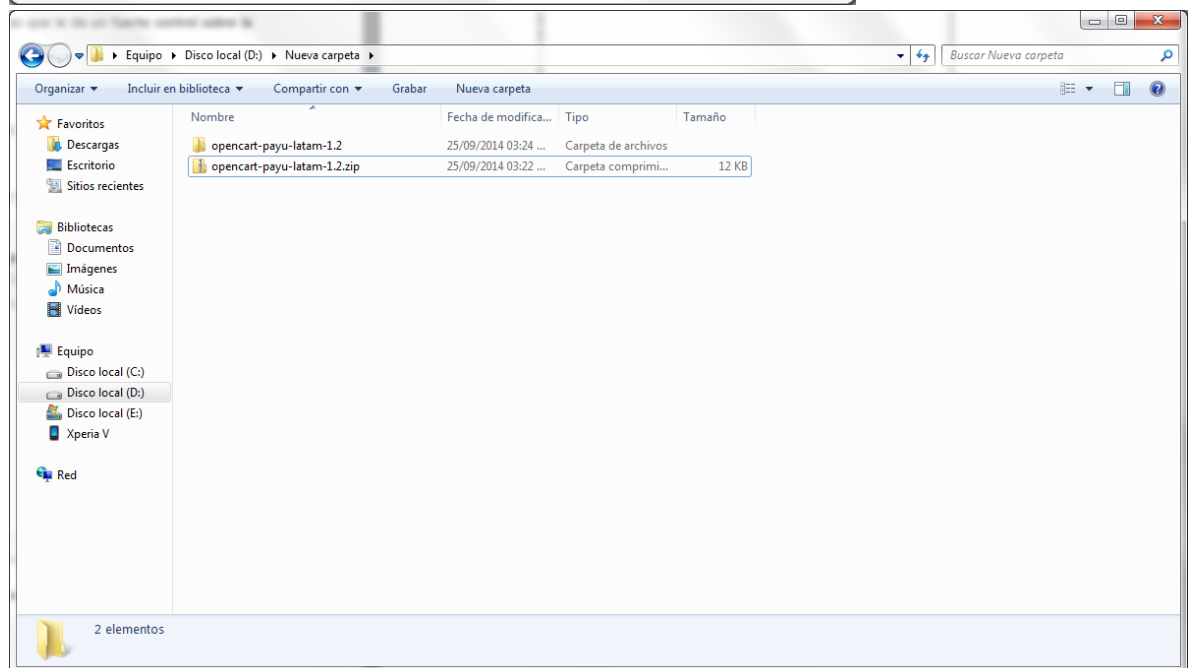

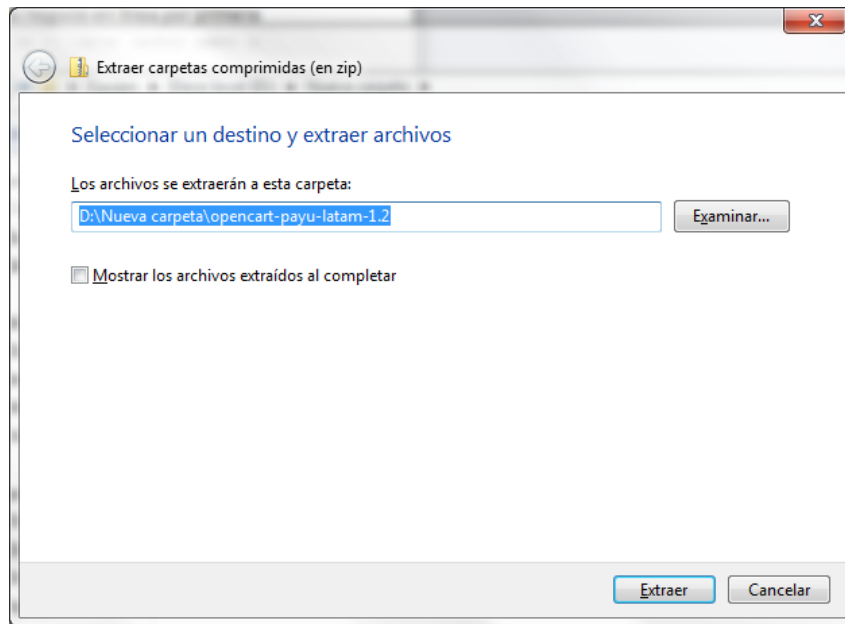

1. Have a Payu Latam account.
2. Have OpenCart version 1.5.5.1 - 1.5.6.X installed

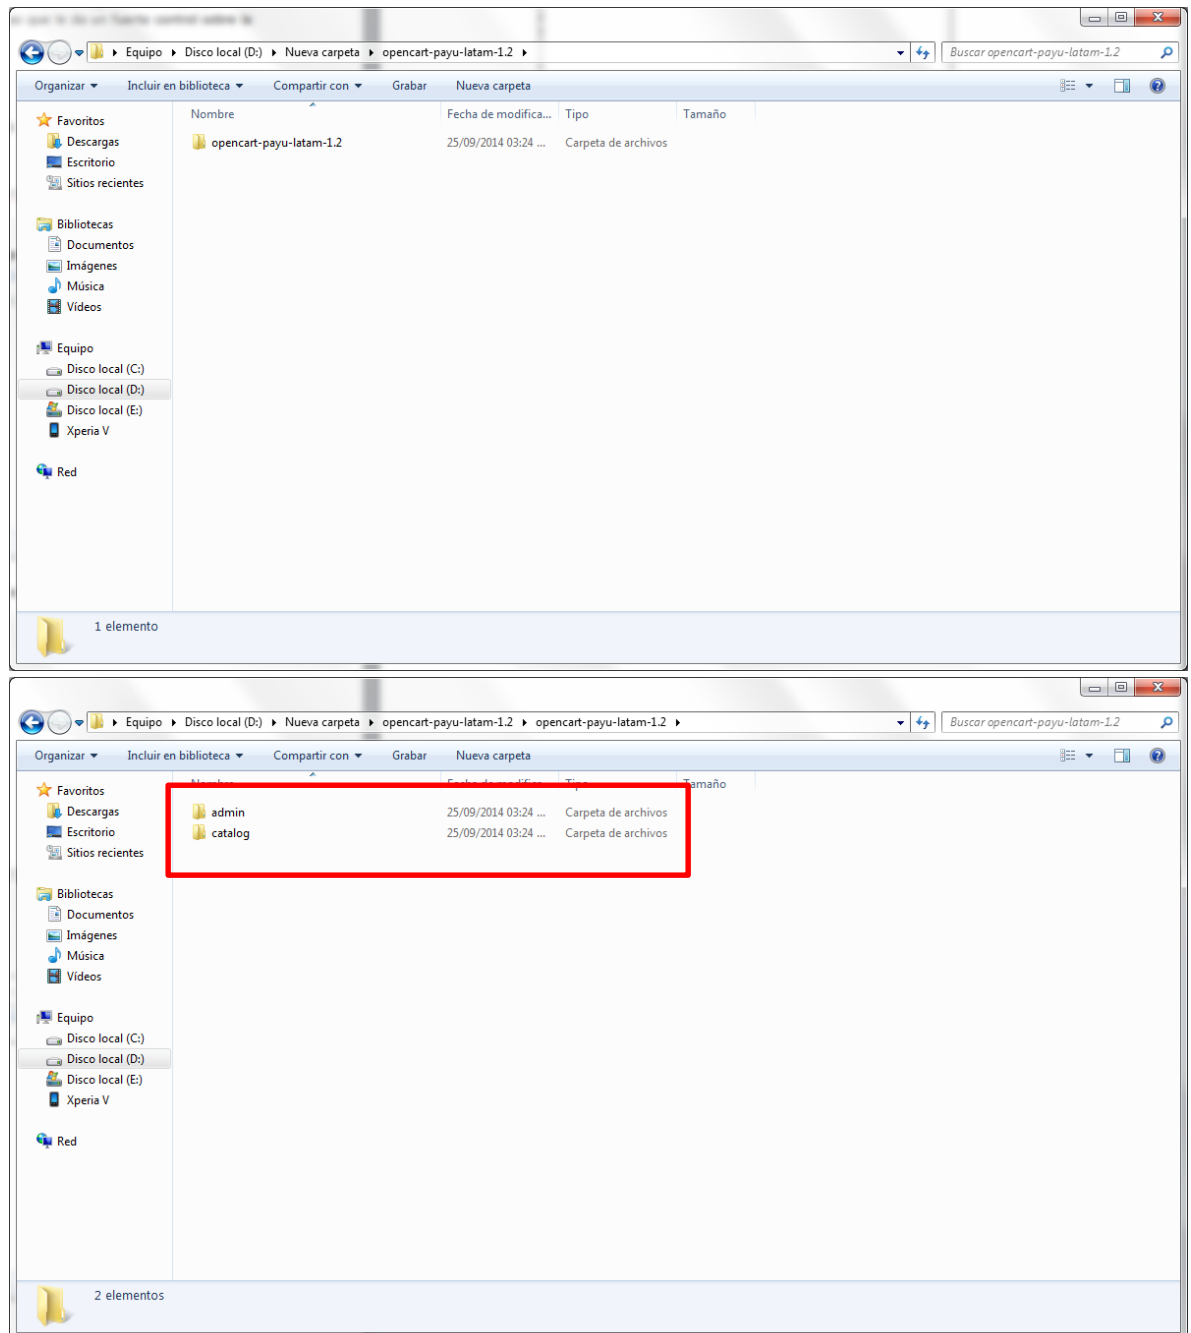

Installation of Payu Latam's plug-in OpenCart:

1. Download Payu Latam's plugin for OpenCart from the following URL: [INSERT URL HERE, ALONG WITH THE IMAGE.](#)
2. A .zip file named 'opencart-payu-latam-1.2.zip' must have downloaded.

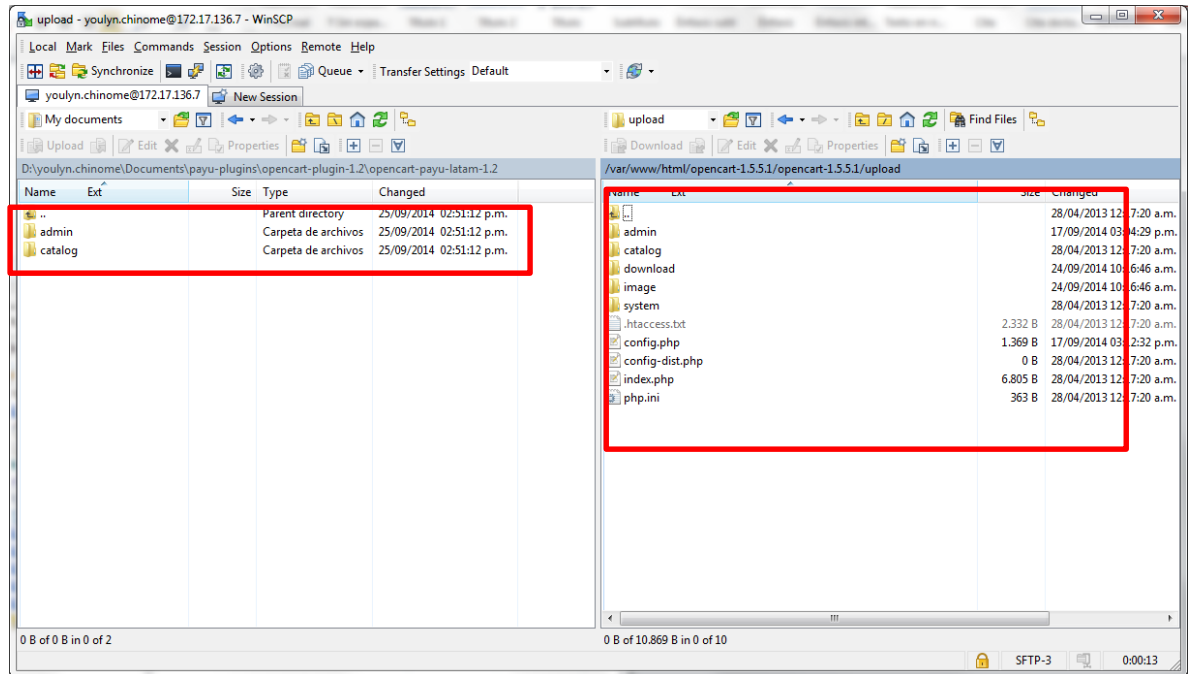

3. Decompress the file and enter the decompressed file.

4. Using an FTP client or program which allows to transfer your files from your local computer to your server, drag the plugin's 'admin' and 'catalog' folders to the root of Opencart's installation on your server.

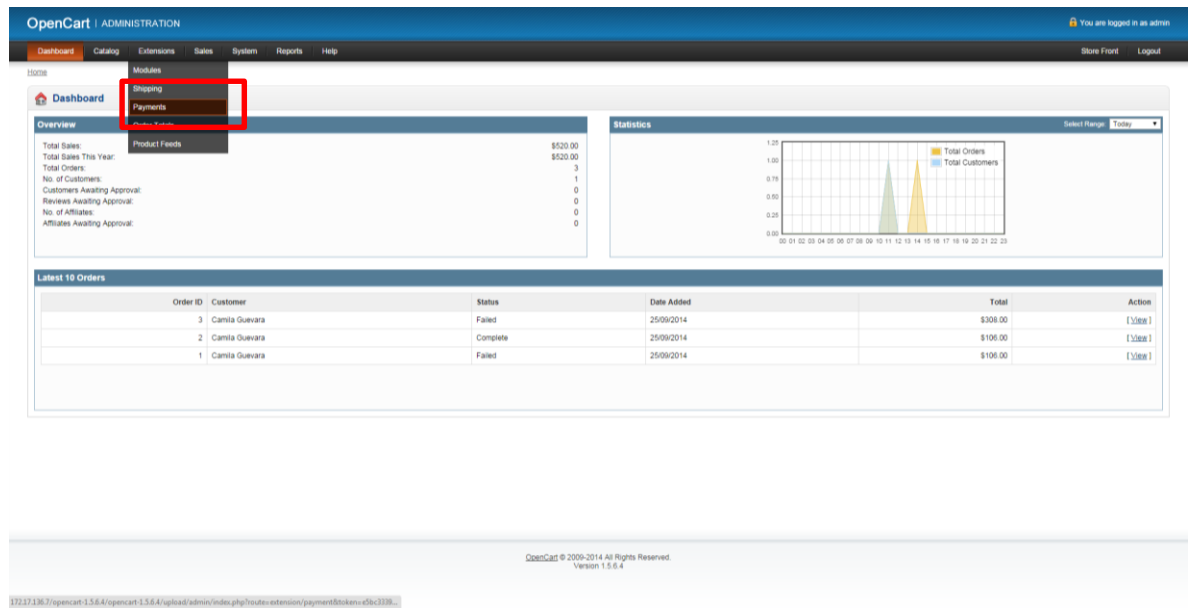

Be careful to “drop” the folders into the empty white space of the location so that no other folder is erroneously selected and the ‘admin’ and ‘catalog’ folders don’t turn into subfolders.

5. The former action will add the plugin files into the right location. You may verify if the action was correct by searching for the following files in the locations as shown in the following image:

6. While you are in the admin of your shop in Opencart go to the Extensions>>Payments menu.

7. Search for the 'PayuLatam' payment means in the payment means table.
