

INSTALLATION MANUAL FOR PAYU'S OPENCART PLUGIN

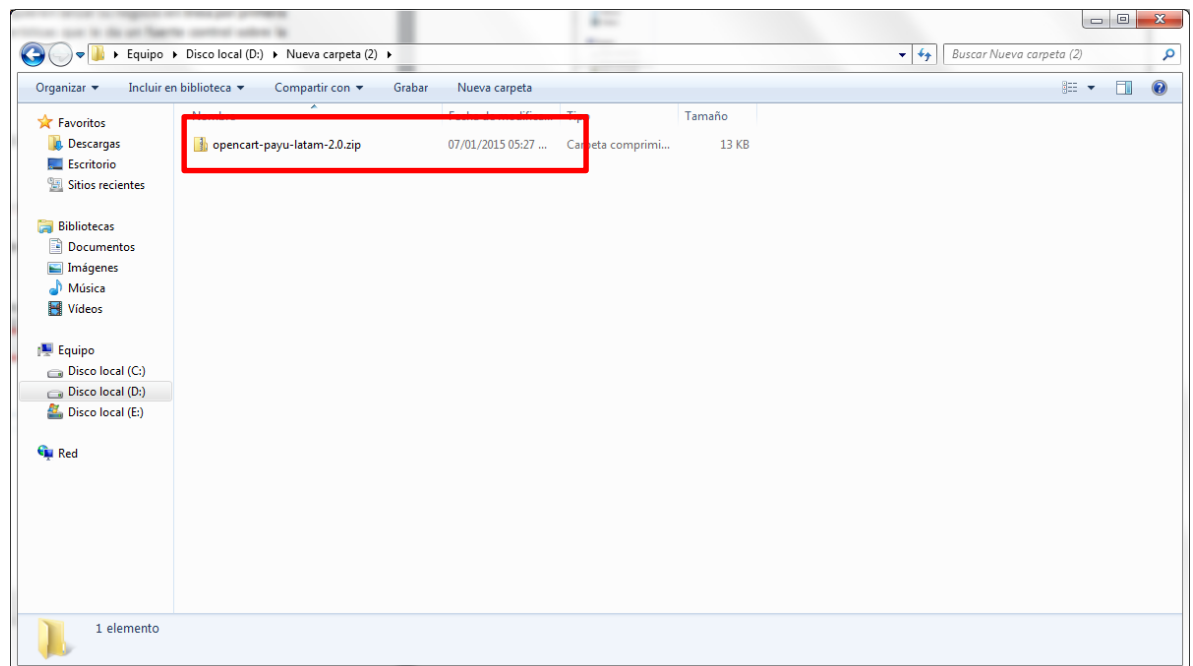

Opencart is a free platform developed in PHP used to create online shops. OpenCart provides a professional and reliable base on which an online shop can be build; this base appeals to a wide variety of users; ranging from web developers seeking a user-friendly interface, to shop owners who want to launch their first online business. OpenCart has a huge amount of features that provide a strong control over your shop's customization.

Prerequisites:

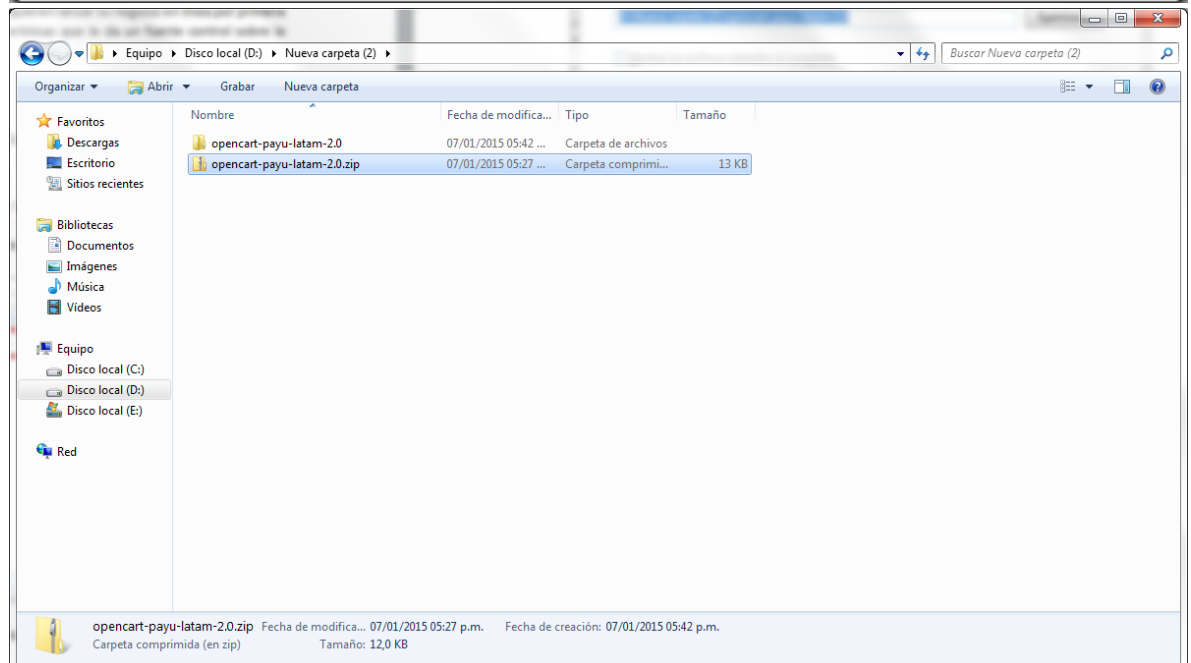

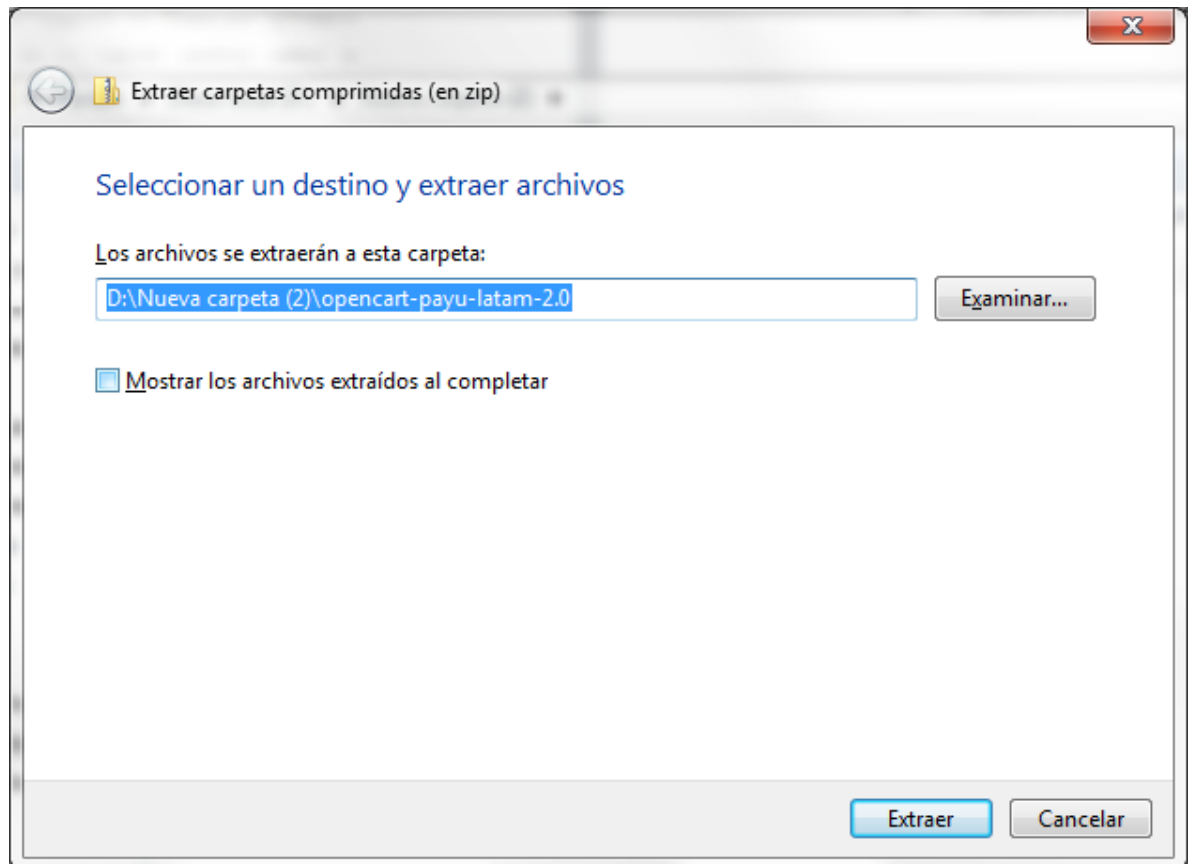

1. Have a PayU Latam account.
2. Have Opencart version 2.0.1.0 or 2.0.1.1 installed

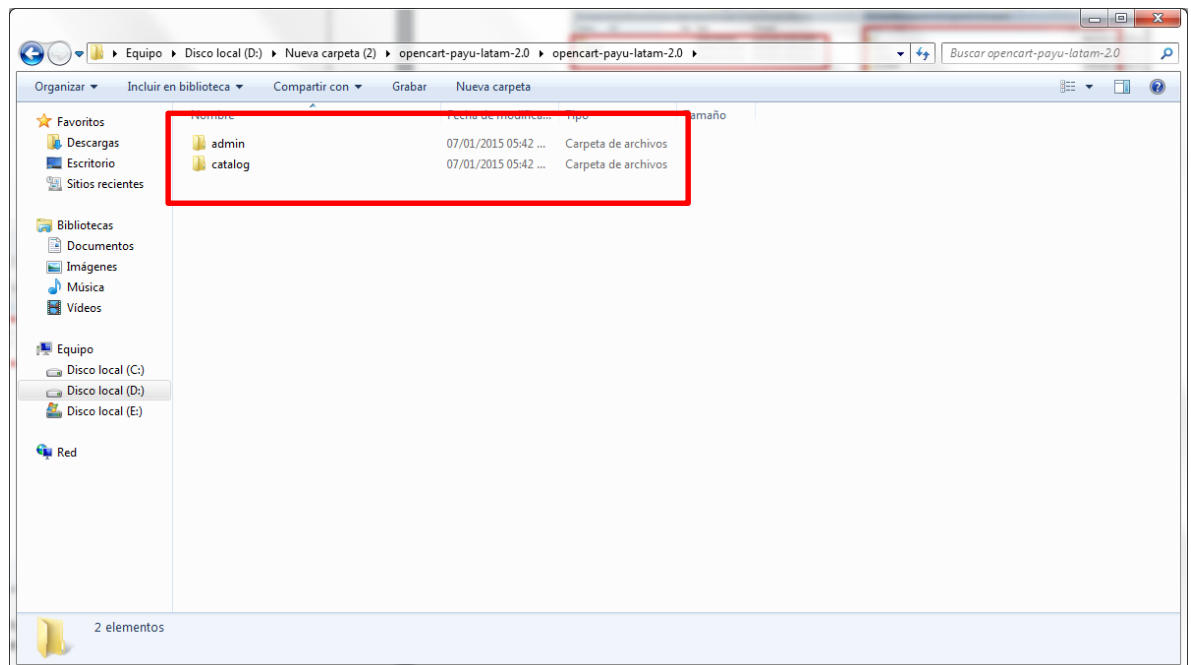

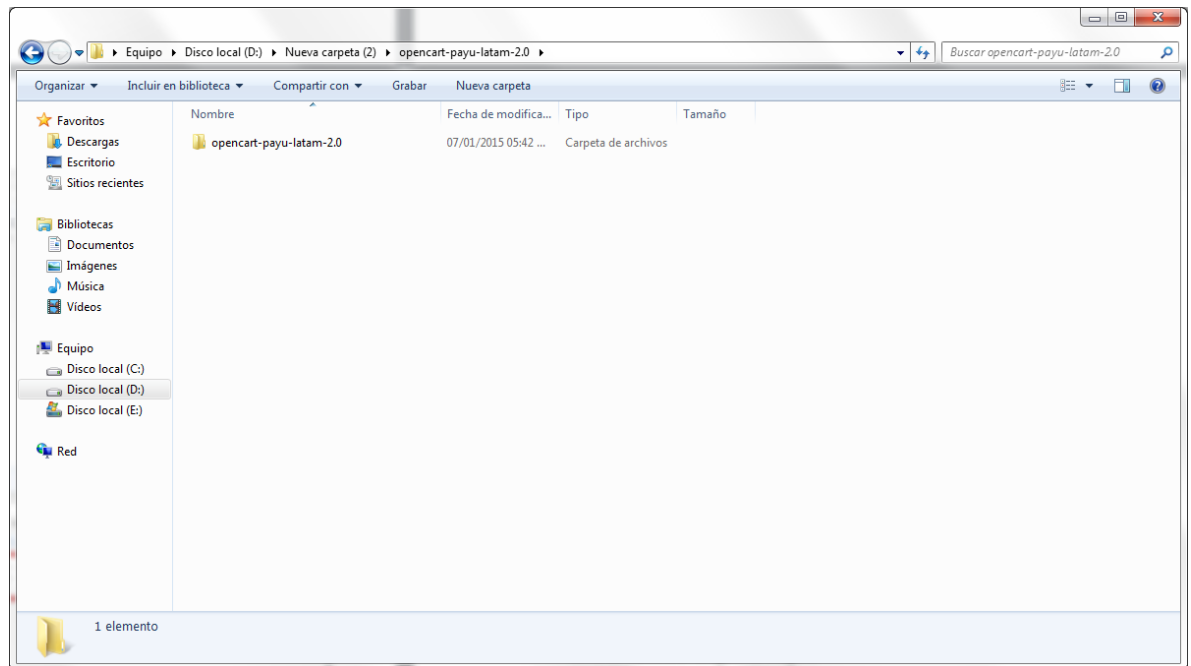

Installing PayU Latam's plug-in Opencart:

1. Download PayU Latam's plugin for Opencart.
2. You should have downloaded a .zip file named 'opencart-payu-latam-2.0.zip'.

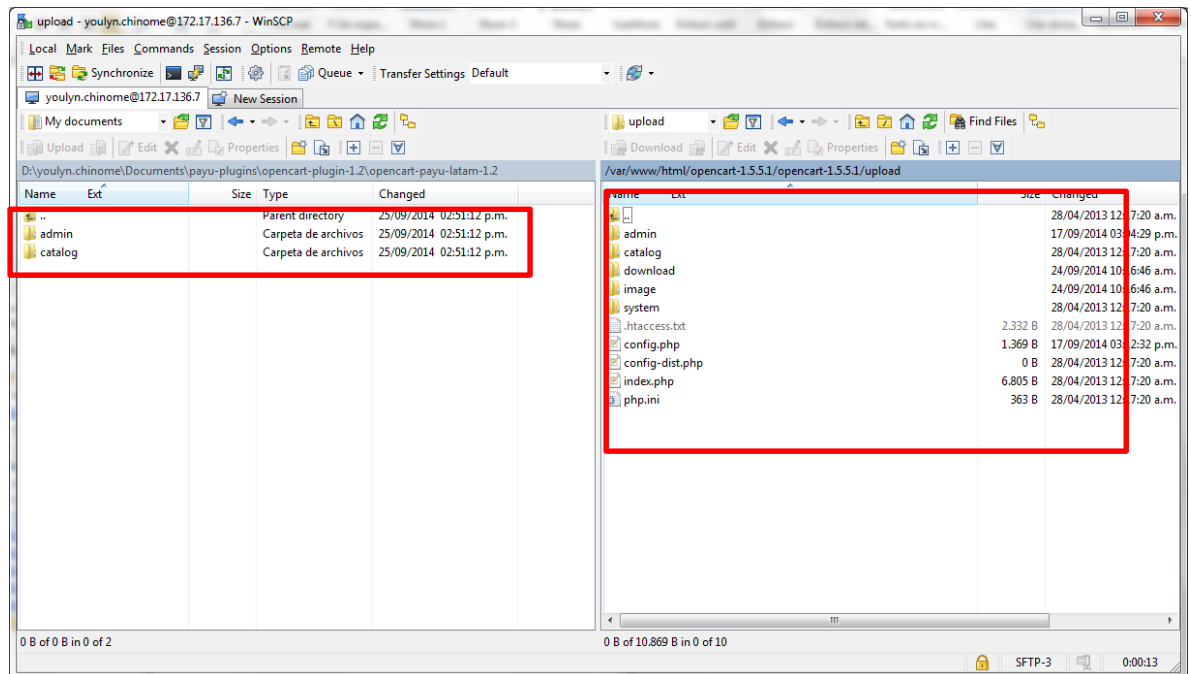

3. Unzip the file and enter the unzipped folder.

4. Using an FTP client or a program to transfer files from your local computer to your server, drag the 'admin' and 'catalog' folders of the plugin to the root of the Opencart installation of your server.

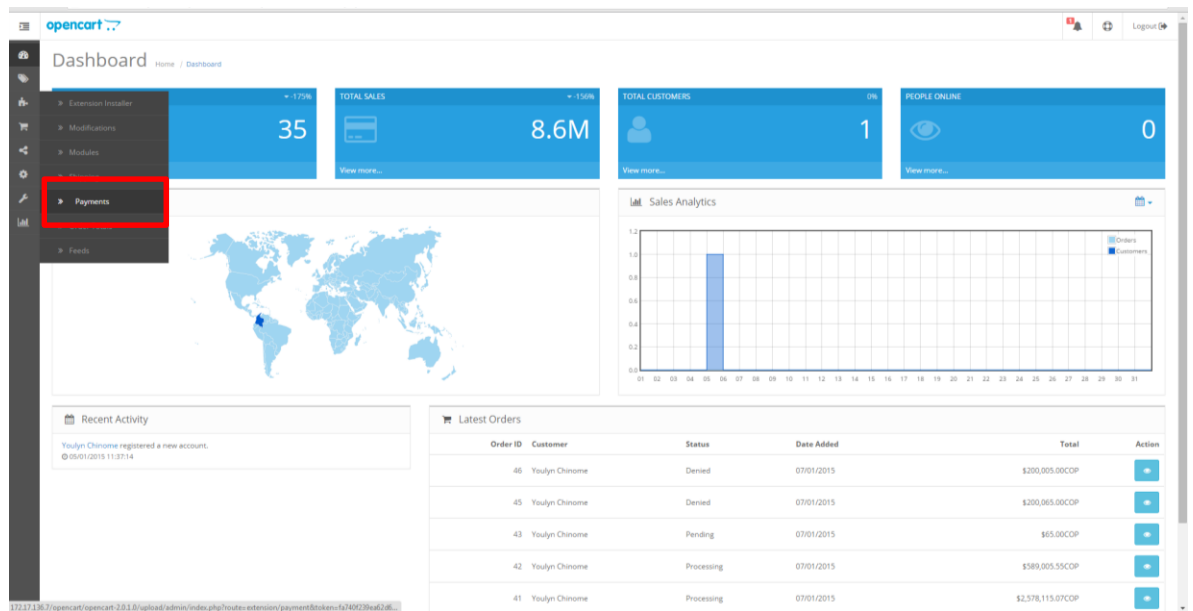

Be careful to 'drop' the folders into the blank space of the location, so as to not select any folder by mistake and in order that the 'admin' and 'catalog' folders do not remain as subfolders.

5. The above action will add the plugin's files to the correct locations. You can check if you did it right by looking for the following files in the locations shown in the following image:

6. While in the admin of your shop's OpenCart, go to the Extensions >> Payments menu.

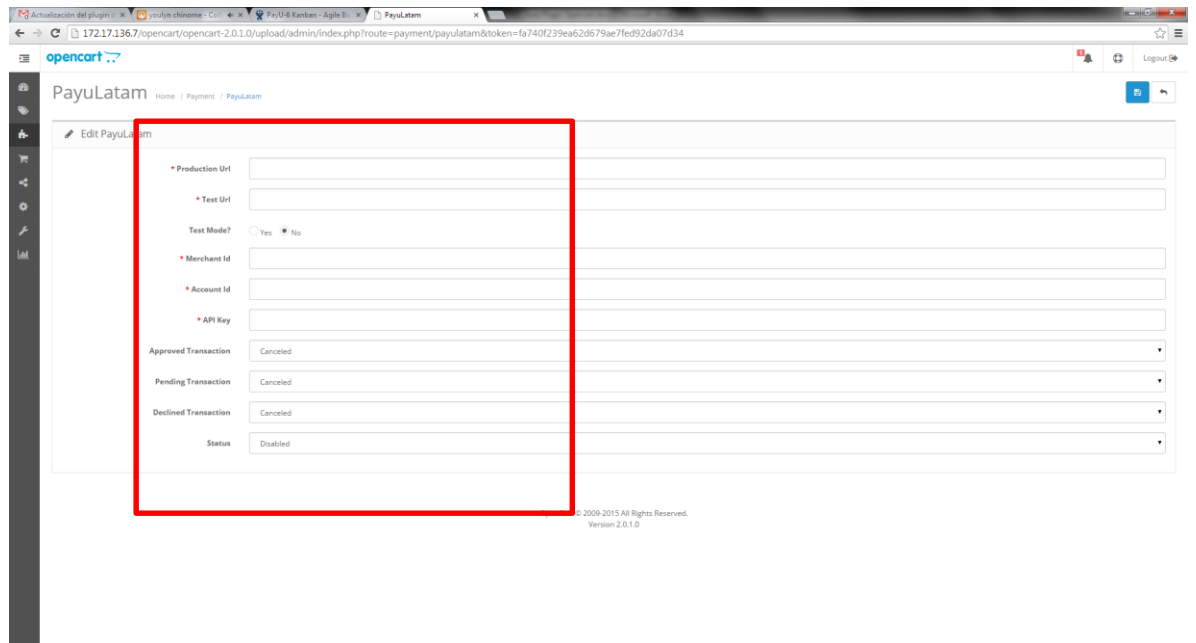

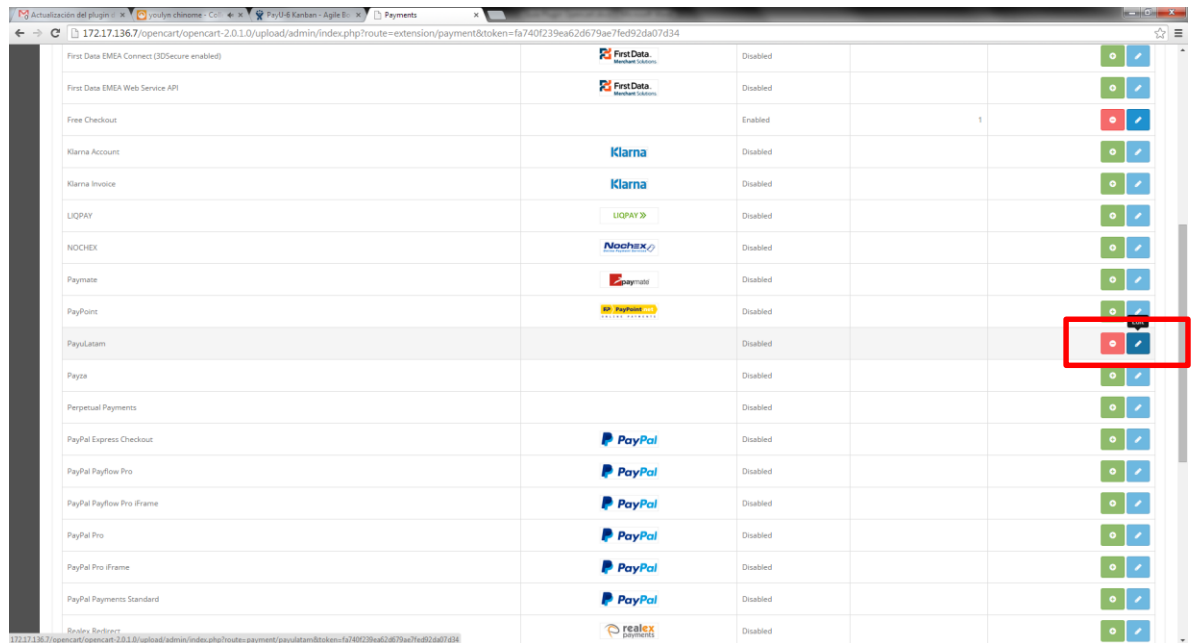

7. Locate the 'PayuLatam' payment means from the table of payment means.

The screenshot shows the 'Payments' page in the OpenCart Admin. A table lists various payment methods. The 'PayuLatam' row is highlighted with a red box. The table includes columns for the payment method name, its logo, status, and action buttons (Install, Edit, Enable/Disable).

Payment Method	Status	Logo	Action
Cheque / Money Order	Disabled		Install Edit Enable/Disable

PayPal Payflow Pro	Disabled	PayPal	Install Edit Enable/Disable
PayPal Payflow Pro iFrame	Disabled	PayPal	Install Edit Enable/Disable
PayPal Pro	Disabled	PayPal	Install Edit Enable/Disable
PayPal Pro iFrame	Disabled	PayPal	Install Edit Enable/Disable

8. Click the Install option and then click the Edit option.

9. Configure your PayU Latam account as follows:

Field	Value
Production Url	PayU Latam's production URL https://gateway.payulatom.com/ppp-web-gateway/
Test Url	PayU Latam's testing URL

	https://stg.gateway.payulatam.com/ppp-web-gateway
Test Mode?	If you want to make transactions in test mode, select the 'Yes' option, otherwise select 'No'.
Merchant Id	Shop's ID in PayU Latam.
Account Id	Account ID by country.
API Key	Provided by PayU Latam, it is unique for the shop.
Approved Transaction	Order/request status in the Opencart store after the transaction's approval by PayU Latam.
Pending Transaction	Order/request status in the Opencart store while the transaction is pending in PayU Latam.
Declined Transaction	Order/request status in the Opencart store after the transaction failed in PayU Latam.
Status	Select the 'Enable' option to indicate that you enable the Opencart payment means.

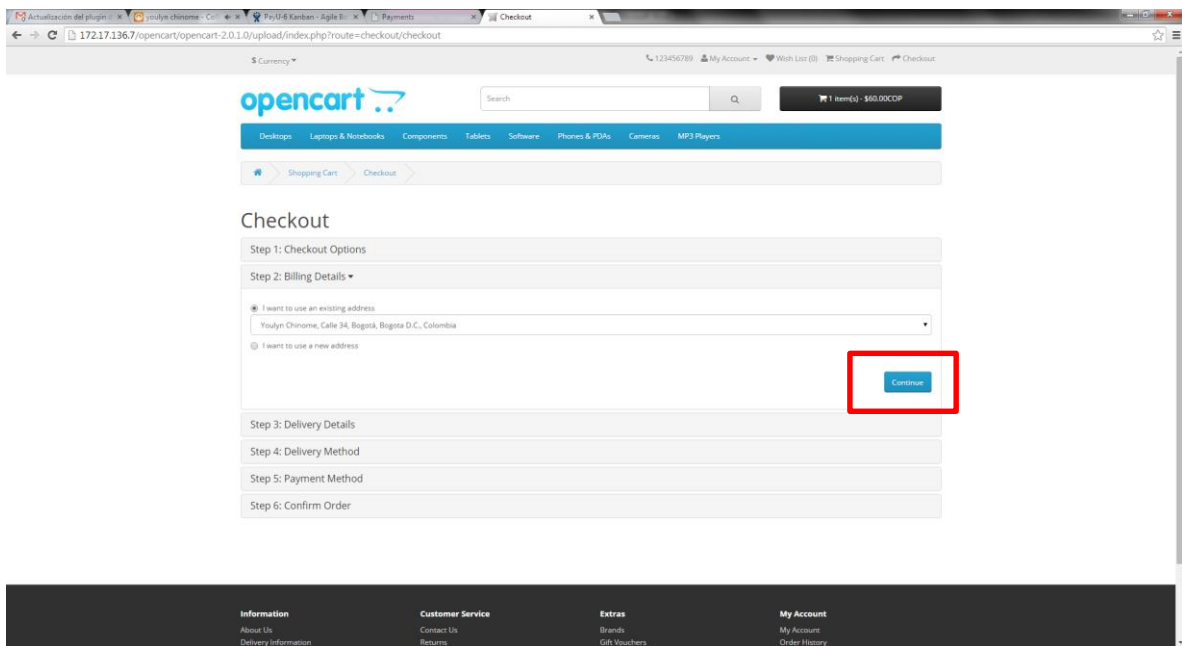

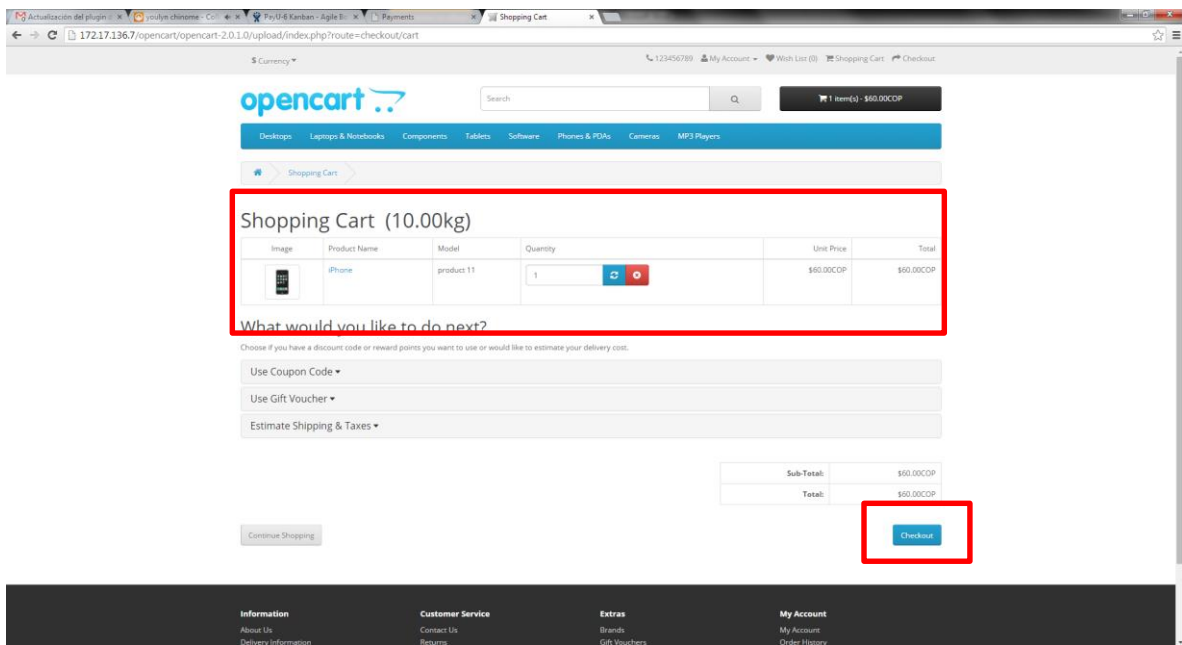

The screenshot shows the 'Edit PayuLatam' configuration page in the OpenCart admin interface. The page is titled 'PayuLatam' and has a breadcrumb trail 'Home / Payment / PayuLatam'. A red box highlights the configuration fields, which include:

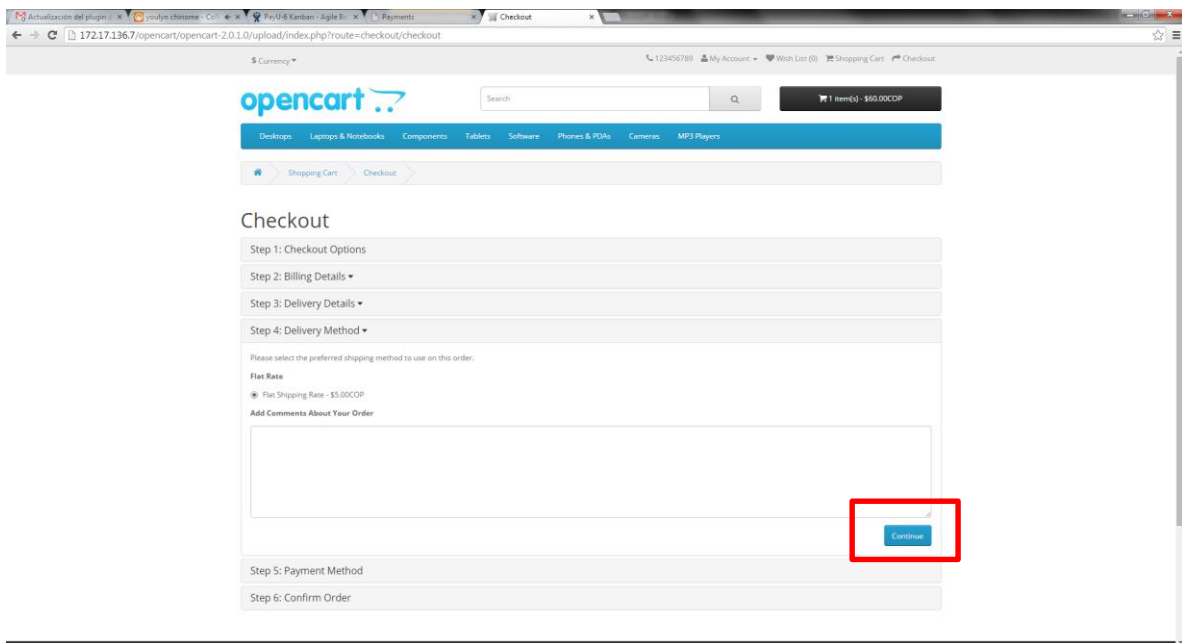

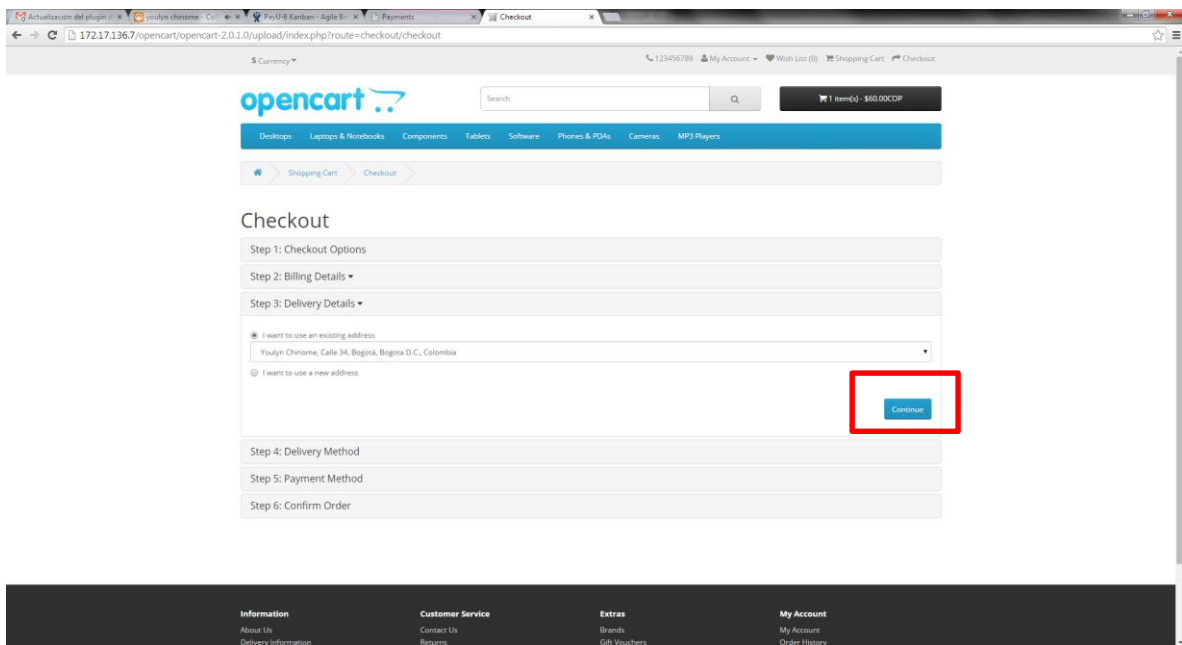

- Production Url: <https://gateway.payulatam.com/ppp-web-gateway>
- Test Url: <https://stg.gateway.payulatam.com/ppp-web-gateway>
- Test Mode?: ☒ Yes ☐ No
- Merchant Id: 1
- Account Id: 1
- API Key: 012345678901
- Approved Transaction: Processing
- Pending Transaction: Pending
- Declined Transaction: Denied
- Status: Enabled

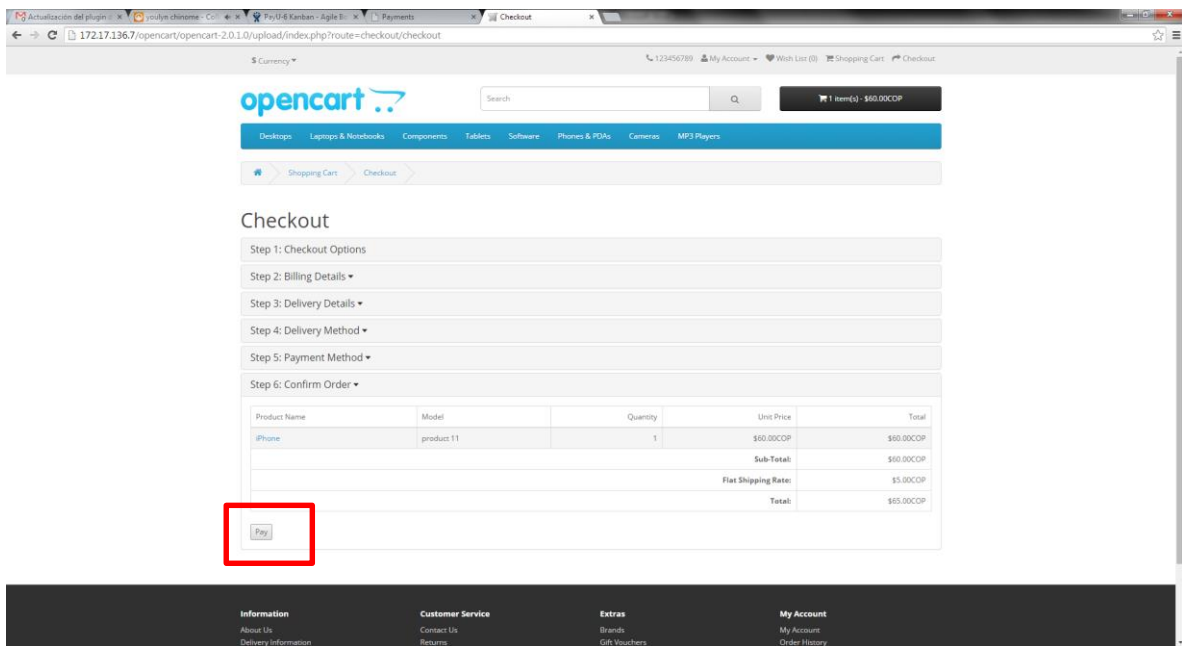

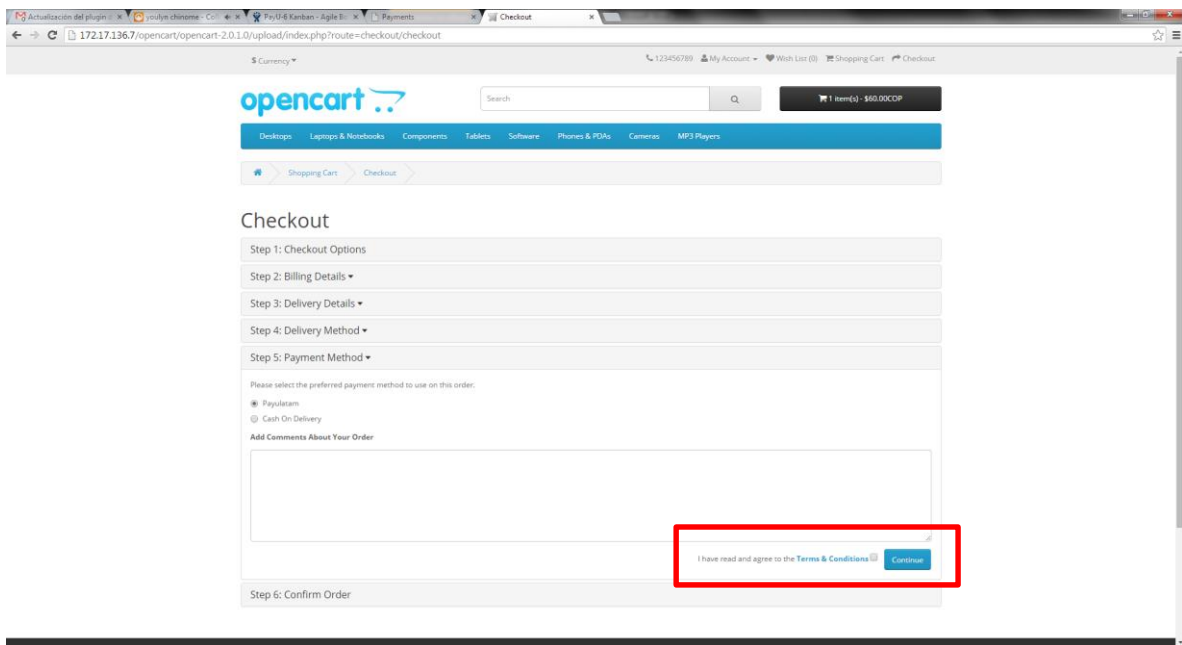

Another red box highlights the top right corner of the page, showing the OpenCart logo and a user profile icon.

Now your customers can pay with PayU Latam when checking out with the Opencart shopping cart.

Opencart will redirect the customer to PayU Latam's payment gateway.
